# Product datasheet for TA326479

## GRP78 (HSPA5) Mouse Monoclonal Antibody [Clone ID: 1H11-1H7]

#### **Product data:**

Product Type:	Primary Antibodies
Clone Name:	1H11-1H7
Applications:	IF
<b>Recommend Dilution:</b>	WB: 1:2000
Reactivity:	Human
Host:	Mouse
lsotype:	lgG2b
Clonality:	Monoclonal
Immunogen:	His-tagged human GRP78
Formulation:	PBS pH7.4, 50% glycerol, 0.09% sodium azide
Concentration:	1 mg/ml
Purification:	Protein G Purified
Gene Name:	heat shock protein family A (Hsp70) member 5
Database Link:	<u>NP_005338 Entrez Gene 3309 Human</u>
Background:	GRP78 is a ubiquitously expressed, 78-kDa glucose- regulated protein, and is commonly referred to as an immunoglobin chain binding protein (BiP). The BiP proteins are categorized as stress response proteins because they play an important role in the proper folding and assembly of nascent protein and in the scavenging of misfolded proteins in the endoplasmic reticulum lumen. Translation of BiP is directed by an internal ribosomal entry site (IRES) in the 5 nontranslated region of the BiP mRNA. BiP IRES activity increases when cells are heat stressed .GRP78 is also critical for maintenance of cell homeostasis and the prevention of apoptosis . Luo et al. have provided findings that suggest GRP78 is essential for embryonic cell growth and pluripotent cell survival .In terms of diseases, GRP78 has been shown to be a reliable biomarker of hypoglycemia, to serve a neuroprotective function in neurons exposed to glutamate and oxidative stress , and its protein levels are reduced in the brains of Alzheimers patients . Also, the induction of the GRP78 protein that results in severe glucose and oxygen deprivation could possible lead to drug resistance to anti-tumor drugs .

BIP; GRP78; HEL-S-89n; MIF2
