Product datasheet for TA807443

LOXL2 Mouse Monoclonal Antibody [Clone ID: OTI8G5]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI8G5

Applications: IHC

Reactivity: IHC 1:150

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Immunogen: Human recombinant protein fragment corresponding to amino acids 152-450 of human

LOXL2(NP_002309) produced in E.coli.

Formulation: PBS (PH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.

Concentration: 1 mg/ml

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Predicted Protein Size: 84 kDa

Gene Name: lysyl oxidase like 2

Database Link: NP 002309 Entrez Gene 4017 Human

Background: This gene encodes a member of the lysyl oxidase gene family. The prototypic member of the

family is essential to the biogenesis of connective tissue, encoding an extracellular copperdependent amine oxidase that catalyses the first step in the formation of crosslinks in collagens and elastin. A highly conserved amino acid sequence at the C-terminus end appears to be sufficient for amine oxidase activity, suggesting that each family member may retain this function. The N-terminus is poorly conserved and may impart additional roles in

chemotaxis to each member of the family. [provided by RefSeq, Jul 2008]

developmental regulation, senescence, tumor suppression, cell growth control, and

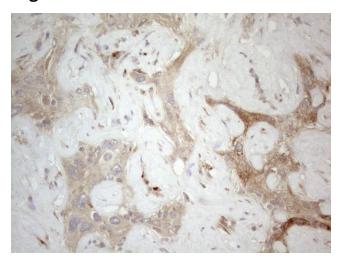

Synonyms: LOR2; WS9-14

Protein Families: Druggable Genome, Secreted Protein
